

ETONX Schools Service

For schools adopting our courses for groups of their students, EtonX offers a special service which includes staff access to our platform, resources for teachers and dedicated customer service and learning support.

1. EtonX Learning Platform access

School admin accounts give you free access to:

- All the courses your students are studying
- Your students' progress and gradebook data and end of course SMART plans
- End of course transcripts for each student who successfully completes the course

For students on our flagship Tutor Group courses:

- Certificates for successful candidates and tutor feedback.

2. Resources for Teachers

Our flexible resources are designed to allow you to integrate EtonX online courses into new or existing programmes or to run standalone clubs and afterschool activities. These resources are available for teachers of students on either of our learning paths (Self Study or Tutor Group):

- **Teacher's Guide:** All you need to know about the course, including the syllabus, explanation of key course topics plus tips from Eton and strategies to broaden your own teaching.
- **Follow Up Activities:** Suggested activities to help you extend students' learning into your classroom and beyond.

For schools adopting our Self Study learning path, where students are not coming into our virtual classroom with an EtonX tutor for live online sessions, we provide you with Workshop materials which provide 4-6 practice sessions on the key concepts and techniques of the course.

EtonX courses your way

How you choose to use our resources is completely up to you! For example, you could:

1. Let your students have the freedom to learn completely independently or
2. Use our workshop plans to create a structured learning programme including face-to-face sessions or
3. Simply check in on students' progress at the end of the course.

3. EtonX Learning Managers and Customer Support

Our friendly team will help you get your students and staff set up. We can organise your students into different groups and ensure that teachers only see the student records that concern them.

We focus on ensuring every student and every member of staff has an excellent experience. While the course is running, we will troubleshoot student engagement, technical queries and all other customer service needs.

Depending on the size of your student group and your needs, we can also offer enhanced support and reporting services.
