

Action Research in Schools

COURSE INFORMATION

- Self-study and Blended Study Options
- Delivered in English
- Suitable for teachers

Action research will enable you to reflect on your practice while completing a small-scale research project.

This course is designed to empower educators with the tools and knowledge to actively engage in research-driven practices within their classrooms. Action research is a systematic approach that enables teachers to identify and address specific challenges, implement innovative strategies, and continually improve their teaching methods. Throughout this course, you will learn how to conduct research, gather and analyse data, and use your findings to enhance student learning outcomes.

WHAT WILL I LEARN IN THE ETONX ACTION RESEARCH IN SCHOOLS COURSE?

ORIENTATION

WELCOME TO THE COURSE

- Meeting the Course Director
- Learn about about other teacher's action research projects
- Structure of course
